

1 ABSTRACT OF THE DISCLOSURE

2 The present invention provides an electronic connector
3 terminal. The electronic connector terminal according to the
4 present invention comprises a terminal base material 2 which is
5 formed by punching a thin metal plate and an Au plating layer 17
6 which covers the terminal base material 2. The terminal base
7 material 2 is defined by a cut surface of the thin plate through
8 punching and comprises a lateral part 4 having at least one contact
9 6, planer parts 5 defined by front and back faces of a punched-out
10 piece. An Au plate layer 17 on the planer parts 5 has the
11 thickness being thinner than the thickness of an Au plate layer 17
12 on the lateral part 4 having at least one contact 6.
